8);

FileOutputStream outputStream = new
FileOutputStream(outputFile);
outputStream.write(output);
outputStream.close();
}
}
```

En aquesta captura podem veure el missatge normal, el missatge xifrat i el missatge descriptat per terminal

En aquesta captura podem veure quina es la clau que ha fer servir per a encriptar i descriptar el fitxer

Autoavaluació:

Creiem que ho tenim tot be ja que ens xifra i ho desxifra amb la clau transparent que s'ha creat.

1. Genera bé la clau i ho llegeix bé el fitxer on hi surt el missatge a encriptar 2/2
2. Encripta el fitxer i ho guarda en un altre 2/2
3. Es guarda bé les dades de la clau en un altre fitxer 2/2
4. Hem fet el codi de descriptar i ens retorna bé el missatge descriptat i es el mateix que l'original 2/2
5. Comentat el codi amb imatges que funciona l'aplicació 1/1
